

## Lessons

Professional instruction is a fun and effective way to learn and improve. Whether a beginner interested in learning the basics or a seasoned player, lessons from a trained eye get results and reduce frustration.

## Club Fitting

Properly fitted clubs are as important as lessons. Off the rack golf clubs are made for "the average" golfer and every company has a different average. Sound confusing? It is! Before investing in golf clubs talk to our experts. Our goal is to sell you a better club not another club.

## Video Analysis

A picture is worth a 1000 words has never been truer. Seeing your swing on video and resulting ball flight identifies swing flaws as well as improper clubs. The Range fitting centre allows you to see the entire flight of the ball rather than just the first few feet.

## Mental Game

The fastest way to lower your golf score! Improve your focus and learn how to develop routines for every shot. Set goals, learn how to practice and make your time at the range and on the golf course more enjoyable.

## "The Range"

**KELOWNA'S COMPLETE PRACTICE FACILITY**

## "The Range"

Kelowna's premier practice facility features a modern **synthetic grass tee** surface and **natural grass** tee area. Our synthetic grass tees closely replicates grass providing a similar feel to real grass and is not hard like a range matt where the club often bounces into the ball. Synthetic grass is better on the body joints as well as your clubs and provides a true representation of shots hit on the course. Our natural grass tees are available in season for a nominal surcharge.

Our large natural grass **putting green** and synthetic grass putting green provide two wonderful surfaces to work on the most important part of the game. Along with a short game and bunker area "The Range" is a complete practice facility everyone will enjoy.

## MENTAL GAME COACHING

### FOCUS DRILL \$29.99

Learn how to develop a solid preshot routine and focus on the shot and the expected result. We will get you started with this drill, supply the range balls and then do a follow up analysis. Allow 30 minutes to complete the focus drill.

### POSITIVE APPROACH DRILL \$39.99

Incorporating preshot routine and focus with a positive approach drill will help the golfer block out the negatives and stay focused on the shot with positive thoughts. Setting a goal for each shot with positive reinforcement. Includes range balls and a follow up analysis.

	60 Minute
1 Lesson	\$50
3 Lessons	\$135
5 Lessons	\$200

### PRIVATE GROUP INSTRUCTION (3 -4 STUDENTS)

	60 Minute
1 Lesson	\$45 per student
3 Lessons	\$120 per student
5 Lessons	\$175 per student

### PRIVATE GROUP INSTRUCTION (5 - 6 STUDENTS)

	60 Minute
1 Lesson	\$40 per student
3 Lessons	\$105 per student
5 Lessons	\$150 per student

### JUNIOR GROUP INSTRUCTION (6 STUDENT MAX)

	60 Minute
4 Lessons	\$90 per student

Lessons include range balls and clubs if necessary

## CLUB FITTING

### CLUB EVALUATION

FREE

Bring in a wood and two irons and we will perform a club analysis checking swing weight, length and club flex. If you are having trouble hitting a few clubs it could well be the club not your swing. Our complimentary evaluation will identify problems.

### FLIGHTSCOPE DRIVER FITTING from \$49.99

Hit a series of shots with one or two drivers to determine what is best for your swing. Flightscope Doppler radar tracks the entire swing and ball flight providing valuable information to make an informed decision and takes the guess work out of buying clubs. (20 minute session)

### FLIGHTSCOPE CLUB GAPPING from \$79.99

Technology now makes it possible to find out how far you hit each club and the shot dispersion for each club. Hitting three shots with each club, ball flight is tracked and graphed providing information that was only available to tour players until Flightscope technology became available at an affordable price. (40 minute session)

### FLIGHTSCOPE SWING ANALYSIS & FITTING \$99.99

A 60 minute session hitting balls on the range with the swing captured on video and the swing and ball flight measured on Flightscope radar. Once a true measure club head speed, tempo, launch angle, spin rate and other data have been determined the information is entered into our fitting program. With this information golf clubs can now be properly matched to the swing.
